

## La Sagrada Familia

### Description

Though the Sagrada Família's construction began around 1882, it stopped during the Spanish Civil War and was slowly resumed since 1950. Its construction should be completed by 2026 and its highest spires are expected to rise up to 170 meters. Despite being technically unfinished, it stands with glory in the heart of Barcelona displaying magnificent gothic styled architecture, breathtaking columns made from granite and basalt rocks and an altar decorated with angel heads.
